## **InOvate Launches SoffitFlow™: Clever Bathroom Venting Solution Addresses Critical Building Science Challenge**

**June 23, 2025 (Jupiter, FL)** – InOvate®, creator of the acclaimed Dryerbox® and DryerWallVent®, today announced the launch of SoffitFlow, a breakthrough venting solution that solves a persistent problem plaguing residential construction: humid bathroom exhaust infiltrating attic spaces through conventional soffit vents.

According to the National Association of Home Builders, moisture-related damage costs U.S. homeowners over \$10 billion annually, with improperly vented bathroom exhaust being a leading contributor. Traditional soffit vents create a pathway for warm, humid air to migrate back into attic spaces, where it condenses on cooler surfaces. This leads to wood rot, insulation degradation, and dangerous mold growth.

SoffitFlow employs a patented directional exhaust system that actively channels humid air away from the building envelope, projecting it beyond the fascia board where it can safely dissipate. The system's integrated gravity-assist damper creates a venturi effect, enhancing airflow velocity while preventing backdraft conditions that plague the old-style installations for bath venting through the soffit.

Precision-manufactured from injection-molded high-density polyethylene (HDPE), SoffitFlow is engineered to withstand extreme weather conditions common in coastal and humid climates. The material's superior UV resistance, thermal stability, and near-zero moisture absorption make it ideal for long-term exterior applications.

Recognizing that even the best-engineered products can run into issues without proper installation, InOvate designed SoffitFlow with contractors in mind. The packaging doubles as a cutting template, and the low-profile design accommodates typical soffit configurations. Compatibility with standard 4-inch ducting ensures seamless integration for existing HVAC rough-in practices.

The system's tool-free maintenance access addresses another industry pain point—the hinged grill allows for simplified cleaning and inspection while helping deter pest entry.

For more information about SoffitFlow, please visit <https://soffitflow.com/> or call 888-443-7937.

### **About InOvate:**

InOvate® delivers quality, high-performance products for the entire exhaust system to help create safer, more efficient homes. A suite of innovative solution-based products – all made in the USA – includes the Dryerbox®, the Dryer-ElI®, the DryerJack®, the DryerPlacard™, the DryerWallVent and FreshVent™.
